

Project Name

Smart Learning Platform

Project Overview

The Smart Learning Platform is a web-based educational system designed for students from Grades 10, 11, and 12. The platform will provide online learning resources, video lectures, quizzes, assignments, progress tracking, and communication tools for students and teachers.

The objective is to create an interactive learning environment where students can access educational content anytime and track their academic performance.

Target Users

1. Students
2. Teachers
3. Administrators

Functional Requirements

Student Module

- Student registration and login
- Profile management
- View enrolled courses
- Watch video lectures
- Download study materials
- Take quizzes and assessments
- Submit assignments
- Track learning progress
- Receive notifications

Teacher Module

- Teacher login
- Upload course content
- Create assignments
- Create quizzes
- Review student submissions
- Grade assignments
- Monitor student progress

Admin Module

- Manage users
- Manage courses
- Manage learning materials
- Generate reports
- Monitor platform activities

Course Management

The platform should support:

- Grade 10 Courses
- Grade 11 Courses
- Grade 12 Courses

Each course should contain:

- Chapters
- Video Lectures
- Notes
- Assignments
- Quizzes

Assessment System

The system should allow:

- Multiple-choice quizzes
- Timed exams
- Automatic grading
- Performance analytics
- Leaderboards

Dashboard Features

Student Dashboard:

- Progress tracking
- Upcoming assignments
- Quiz scores
- Learning statistics

Teacher Dashboard:

- Student performance analytics
- Assignment review section
- Course management tools

Admin Dashboard:

- User statistics
- Course statistics
- Platform reports

Non-Functional Requirements

- Responsive web application
- Secure authentication
- Fast loading performance
- Mobile-friendly interface
- Scalable architecture

Project Deadline

6 Months

Budget

₹5,00,000

Expected Deliverables

- Complete web application
- Database design
- User authentication system
- Learning management system
- Analytics dashboard
- Deployment documentation

Success Criteria

- Support at least 5000 students
- Support 500 teachers
- Maintain 99% uptime
- Responsive across desktop and mobile devices
